CONDITIONS OF SALE

Our stock is well rooted, well grown, correctly dug, and in excellent growing condition when it leaves the Garden Center. We will replace at **ONE HALF the price paid,** any plant that fails to leaf out by the following August. Potted Roses carry a full replacement guarantee. The customer will assume the planting labor involved. The above is valid only if the account has been paid in full within thirty days.

Since we lose control of the plant once it has left our Garden Center, we feel that the customer should assume part of the responsibility of its success inasmuch as proper care could largely determine its growth.

NOT GUARANTEED

We do not guarantee house plants, live Christmas trees, annuals, perennials, bulbs, vines, or ground covers because of the greater risk involved.

UNCONDITIONAL GUARANTEE

A Certificate of Unconditional Guarantee for one year from date of purchase will be issued upon payment of an additional 10 per cent of the cost of the plants. This Guarantee shall cover all nursery stock. but does not include labor.

YEWS (TAXUS)

More and more yews are planted each year, as people appreciate their many good qualities. They are available in a wide variety of shapes from low spreading kinds to tall pyramids. Yews are rather slow growing and a light pruning each spring before the growth starts will keep them in bounds. They are disease and insect free. They should be fertilized in early May with a complete fertilizer.

SHADE TREES

In the past, large, fast-growing trees were planted and the small and medium growing trees were ignored. Today the trend is toward smaller trees and with good reason, since their form, color, and foliage is unlimited. They also are best-suited for use in landscaping our generally smaller, lower, modern homes. Unless otherwise indicated, prices are for bare root trees. Add \$1.00 to bare root prices if tubbed in ½ bu. basket or equivalent; \$1.50 in 1 bu. basket or equivalent. See B&B price schedule on last page of catalog for additional charge if tree is to be balled and burlapped.

GARDEN SUPPLIES

The following is only a partial listing of the hundreds of items we carry in seeds, fertilizers, insecticides, tools and garden gadgets.

LAWN SEED

Grass seed is a minor item of expense in good lawn construction. It is wise economy to buy the best possible grass seed mixture. The mixtures we list are ones that we have found to be best in our own landscape work.

FERTILIZERS

The following fertilizers are used by us in our greenhouses and landscape work. You can be sure of their performance. For lawns, we highly recommend using fertilizer containing ORGANIC nitrogen, which is longer lasting and less apt to burn the grass than farm or straight chemical fertilizer. Ask for special prices on large quantities.

TOP SOIL

Unfortunately top soil is becoming more difficult to obtain each year. The top soil we offer is used successfully in our greenhouses and landscaping work. Although it often does not have the dark color nor medium texture customarily associated with top soil in years gone by, this does not seriously detract from its usefulness for lawns or general planting.
